

Mowers (UK) Ltd

Mowers UK is a lawnmower and garden machinery sales and service retailer. We have seven full time staff. We have been using Aspen for more than five years.

We started using it because we were impressed with the storage shelf life and the benefits to the environment.

On average our service engineers are using Aspen for around 40 hours per week. We use it in our workshop as it reduces the negative health risks to our staff and it offers better reliability following a service to our customer's machine. We have found that the engines run cleaner and start much easier.

Since using Aspen the biggest difference to our staff is they rarely suffer from headaches. In the past, headaches were a regular side-effect of using normal pump fuel.

It became so common that we kept a large pack of headache pills in our first aid box. Now our staff are much happier working in a safer and healthier environment.

Yours sincerely,

S. Rogers
